

Medical Services That Work for You

We offer exclusivity in the latest technology for pre-employment, return to work, and workers compensation screenings. The BTE Functional Testing System, exclusive only to HealthWorks Medical, LLC has been proven to reduce workers compensation claims.

The BTE Functional Testing System

BTE (Baltimore Therapeutic Equipment) functional capacity evaluation provides employers with superior processes and technology, to optimize productivity - from job assessment, employment screening, to evaluation and treatment, to job-matching and return to work - resulting in lower absenteeism/turnover, improved safety, reduced injuries and claims costs, and measurably increased performance. These services address injury prevention, functional baseline, recovery tracking and return to work program solutions; all integrated in proprietary web-based software, linked to measurement technology. The BTE testing prevents absence due to injury and disability and returning employees to safe work if an injury or disability occurs. The BTE is the most advanced system used for pre-placement examinations and is only available at HealthWorks Medical, LLC. Visit www.btetech.com/evaltech to learn more.

Benefits of the BTE

- ◆ Promotes proper job placement by qualifying 92% of the workforce, therefore reducing work-related injuries by 8%.
- ◆ American Disability Act (ADA) compliant.
- ◆ Screens for Strength, Endurance, Agility, and more.
